

Yutthana Satorn (Nui)

064-910-6355 | yutthanasatorn5@gmail.com | Buriram, Thailand 31220

PROFILE SUMMARY

Final-year Computer Engineering student with hands-on full-stack experience, from designing database schemas to building user interfaces. Enjoys taking ownership of end-to-end features and picking up new tools quickly. Seeking a cooperative education placement to contribute to enterprise IT solutions while continuously learning and growing alongside an experienced tech team.

EDUCATION

Suranaree University of Technology (SUT) <i>Bachelor of Engineering in Computer Engineering</i> - GPAX : 3.88 - Relevant coursework: Software Engineering, Data Structures & Algorithms, Object-Oriented Technology, Database Systems, System Analysis & Design, Software Testing	Nakhon Ratchasima <i>June 2023 – Present</i>
Nangrong School <i>Science - Mathematics</i> GPAX : 3.96	Nangrong, Buriram <i>May 2019 – March 2022</i>

PROJECTS

SDGs Data Management and Reporting System (Senior Project) <i>Tech: React, TypeScript, Go (Gin, GORM), PostgreSQL</i> - Developed a full-stack SDG data hub for the university's THE Impact Rankings submission, building the entire bilingual (EN/TH) public site with three-level hierarchical navigation. - Built a RAG pipeline that drafts citation-backed SDG evidence reports by combining pgvector semantic retrieval with a transactional SQL fact snapshot, so no claim ships without a traceable source. - Engineered an activity module using a custom Tiptap editor with rich media support (self-hosted video, YouTube, color picker), backed by REST APIs and object storage.	2026
ENGi Graduation Verification System <i>Tech: React, JavaScript, Ruby on Rails, PostgreSQL</i> - Engineered a full-cycle course registration system featuring a recursive prerequisite tree that computes each student's status from real enrollment history. - Implemented a schedule-conflict detection algorithm and a <i>simulate-then-commit</i> transaction pattern that guarantees atomicity across batched add/drop operations.	2025
Digital Library Management System <i>Tech: Go (Gin, GORM), React, TypeScript, SQLite</i> Developed a full-stack application by building REST APIs for book data management, and engineering an in-browser e-book reader (PDF.js/epub.js) featuring a dashboard to track reading activity.	2025

TECHNICAL SKILLS

Languages: Go, Python, HTML/CSS, TypeScript/JavaScript, SQL
Frameworks & Technologies: React, Gin, GORM, REST APIs, JWT, Ant Design
Databases & Tools: MySQL, PostgreSQL, SQLite, Git/GitHub, Figma

ADDITIONAL INFORMATION

Languages: Thai (Native), English (Intermediate)
Soft Skills: Fast Learner, Problem Solving, Responsible, Detail-Oriented, Team Collaboration
