

Yutthana Satorn (Nui)

064-910-6355 | yutthanasatorn5@gmail.com | Buriram, Thailand 31220
portfolio: portfolio-yutthana.vercel.app

PROFILE SUMMARY

Final-year Computer Engineering student with hands-on full-stack experience, from designing database schemas to building user interfaces. Enjoys taking ownership of end-to-end features and picking up new tools quickly. Seeking a cooperative education placement to contribute to enterprise IT solutions while continuously learning and growing alongside an experienced tech team.

EDUCATION

Suranaree University of Technology (SUT)

Bachelor of Engineering in Computer Engineering

Nakhon Ratchasima

June 2023 – Present

- GPAX : 3.88
- Relevant coursework: Software Engineering, Data Structures & Algorithms, Object-Oriented Technology, Database Systems, System Analysis & Design, Software Testing

Nangrong School

Science - Mathematics

Nangrong, Buriram

May 2019 – March 2022

- GPAX : 3.96

PROJECTS

SDGs Data Management and Reporting System (*Senior Project*)

2026

Tech: React, TypeScript, Go (Gin, GORM), PostgreSQL

- Developed a full-stack SDG data hub for the university's THE Impact Rankings submission, building the entire bilingual (EN/TH) public site with three-level hierarchical navigation.
- Built a RAG pipeline that drafts citation-backed SDG evidence reports by combining pgvector semantic retrieval with a transactional SQL fact snapshot, so no claim ships without a traceable source.
- Engineered an activity module using a custom Tiptap editor with rich media support (self-hosted video, YouTube, color picker), backed by REST APIs and object storage.

ENGi Graduation Verification System

2025

Tech: React, JavaScript, Ruby on Rails, PostgreSQL

- Engineered a full-cycle course registration system featuring a recursive prerequisite tree that computes each student's status from real enrollment history.
- Implemented a schedule-conflict detection algorithm and a *simulate-then-commit* transaction pattern that guarantees atomicity across batched add/drop operations.

Digital Library Management System

2025

Tech: Go (Gin, GORM), React, TypeScript, SQLite

- Developed a full-stack application by building REST APIs for book data management, and engineering an in-browser e-book reader (PDF.js/epub.js) featuring a dashboard to track reading activity.

TECHNICAL SKILLS

Languages: Go, Python, HTML/CSS, TypeScript/JavaScript, SQL

Frameworks & Technologies: React, Gin, GORM, REST APIs, JWT, Ant Design

Databases & Tools: MySQL, PostgreSQL, SQLite, Git/GitHub, Figma

ADDITIONAL INFORMATION

Languages: Thai (Native), English (Intermediate)

Soft Skills: Fast Learner, Problem Solving, Responsible, Detail-Oriented, Team Collaboration
